

[RC_PD Training] Unlimited Leverage English

Premium Unlimited Leverage Account Introduction

Premise:

As market demand for high-leverage trading products continues to grow, some competitors in the industry have introduced mechanisms such as “**dynamic high leverage**” or even “**unlimited leverage**” to enhance trading appeal and market competitiveness.

In response to increasing market competition and to boost trading activity, it is proposed to introduce an “**Unlimited Leverage**” account type as an advanced feature option for high-tier clients and specific account types.

account name	STP Account	STP Unlimited leverage Account
launch date	--	2026.03.09 Existing MT4 Premium accounts will be upgraded to MT4 Premium Unlimited accounts and will no longer offer old Premium Account applications 2026.03.09: Priority launch for Vietnam, India, CIS, Russia, and Mongolia. 2026.03.23: Expanded access to new Premium Unlimited Account applications in the rest of APAC
Account opening conditions	--	• A User ID must execute at least 10 trades within one year, with a minimum total lot size of 3 lots, to be eligible to open an Unlimited Leverage account. * Original upgraded premium clients are not subject to this restriction • Products included: Forex, Gold, Oil, BTCUSD Objective: To avoid robot account opening.

		
Minimum deposit	\$50	\$200 - \$3,000 USD (in accordance with the Premium Account deposit requirements) * Vietnam will be changed to \$200 USD
Copy Trading	Yes	No
Credit	Yes	No
Rebate	- Forex 8 point - Gold, Oil 13 point - Silver 14 point	Forex, Gold, Silver, Oil up to 35% Total Spread
Stop Out / Margin Call	20% / 50%	0% / 30%
client leverage	1:500 / 1:1000 / 1:2000	1 : 2,000,000,000 Clients can only use 2 billion leverage. No other leverage options can be made on the client portal 

application group	--	MT4 AU6: M_VUR_USD (EUR, GBP, HKD, JPY) M_VUR_NM_USD M_VIGR_USD (EUR, GBP, HKD, JPY) M_VIGR_NM_USD MT5 AU2: VU_Hedge\M_VUR_USD (EUR, GBP, HKD, JPY) VIG_Hedge\M_VIGR_USD (EUR, GBP, HKD, JPY) VIG_Hedge\M_VIGR_NM_USD VIG_Hedge\M_VUR_NM_USD																				
Product Leverage	- Forex up to 1:2000 - Gold up to 1:2000 - Oil 1:500 - Index up to 1:500 - Silver 1:100 - Crypto up to 500:1 - Shares up to 33:1	- Forex up to Unlimited - Gold up to Unlimited - The remaining product leverage is the same as the STP/ECN account type Remarks: Some forex such as AUDCNH, AUDSGD, CHFSGD, EURSGD, GBPSGD, NZDSGD, SGDJPY, USDCNH, USDNOK, USDSEK, USDSGD maintain fixed leverage, excluded from unlimited leverage applications																				
Stop Out Logic for Hedge Positions	After triggering Stop Out, the position will not be forced closed until 3 days later	The position will be forced closed immediately after triggering Stop Out																				
Application of risk control system

Dynamic leverage

Rules:

1. Impact time: 15 minutes before and five minutes after the announcement during the news period, and 1 hour before the market closes and 30 minutes after the market opens from Monday to Friday.

FOMC interest rate decisions, CPI, PMI, NMI, PPI, GDP, PCE, Retail Sales, NFP (Non-Farm Payrolls), ADP (Private Payrolls), and Crude Oil Inventories

2. Affected Products: Forex, Gold, Oil, Indices, Adjusted to Fixed Leverage 200:1

3. Scope of influence: Only new positions opened during the period are affected. After the period, the leverage will return to normal.

4. A. USD News: Affects Gold, Forex, and Indices (does not affect Oil).

Includes: FOMC interest rate decisions, CPI, PMI, NMI, PPI, GDP, PCE, Retail Sales, NFP (Non-Farm Payrolls), ADP (Private Payrolls).

B. Oil News: Affects Oil products only.

Includes: Crude Oil Inventories.

C. News from Other Countries: Affects all Forex pairs (does not affect Gold, Oil, or Indices).

Includes: CPI, PMI, and GDP releases from non-US countries.

5. Notice content: The news period events and rules for the coming week will be regularly published in the official website announcement every Friday

Weekly Leverage Notification

Please be advised that during the following timeframes, new positions of affected instruments will open with a temporary leverage limit of 1:200.

Date	Day	Time (GMT+2)	News Event	Currency	Start Time	End Time
2026/1/19	Monday	4:00	GDP (YoY) (Q4)	CNY	3:45	4:05
2026/1/19	Monday	12:00	CPI (YoY) (Dec)	EUR	11:45	12:05
2026/1/21	Wednesday	9:00	CPI (YoY) (Dec)	GBP	8:45	9:05
2026/1/22	Thursday	15:30	GDP (QoQ) (Q3)	USD	15:15	15:35
2026/1/22	Thursday	17:00	Core PCE Price Index (YoY) (Nov)	USD	16:45	17:05
2026/1/23	Friday	5:00	BoJ Interest Rate Decision	JPY	4:45	5:05
2026/1/23	Friday	16:45	S&P Global Manufacturing PMI (Jan)	USD	16:30	16:50

Existing positions opened before the window are not affected. Once the period ends, your original leverage settings will automatically resume.

Margin and equity protection	Negative Equity Protection - If the current Equity ≤ 0, or if placing an order would cause the Equity to be ≤ 0, opening new orders will not be allowed. negative margin protection - If the current Free Margin ≤ 0, or if a transaction would cause Free Margin ≤ 0, increasing exposure will not be allowed (including opening new positions or unlocking hedged positions).	In addition to maintaining the standard account rules, the following protection will be introduced: If Equity – Fees (including spread and commission) ≤ 0, opening new positions will not be allowed. Purpose: To prevent clients from fully utilizing unlimited leverage to maximize their positions for rebate arbitrage, and to avoid situations where large trading volumes generate high transaction costs that could immediately push the account into a negative balance, thereby affecting the trading experience. * Please note: At the moment of execution, orders may still be subject to slippage caused by market depth or ticks, which may result in stop-out or liquidation risk. Clients should be aware of and carefully manage their trading risks.
withdrawal logic	withdraw $\leq$ Balance withdraw $\leq$ Equity Margin Level $\geq 100\%$ During news periods, market open/close periods, and market closure periods (weekends), withdrawals or internal transfers must meet the following condition: Equity $\geq$ Net Position Exposure / 200 <i>For example, 1 lot USDJPY account Equity must not be less than \$500 after withdrawal</i>	

Dynamic Leverage Logic and Cases

News Period Margin Logic:

A – Net exposure before a certain trade action (+ Buy / – Sell)

$$A = |b| - |s|$$

B – Net exposure after a certain trade action within ST (+ Buy / – Sell)

$$B = |b'| - |s'|$$

M(A), M(B) – margin for all the positions within a certain symbol

MR_sp – margin per lot during SP

1. if $(A \cdot B > 0)$ AND $|B| < |A|$ then $M(B) = M(A) \cdot |B/A|$

If exposure decreases during the news period (same direction), the margin requirement will decrease proportionally based on the exposure before and after the adjustment.

2. if $(A \cdot B > 0)$ AND $|B| \geq |A|$ then $M(B) = M(A) + MR_sp \cdot (|B| - |A|)$

If exposure increases during the news period (same direction), the additional exposure opened during the news period will be calculated using the leverage applicable during the news period.

3. else (i.e. if $A \cdot B \leq 0$) then $M(B) = MR_sp \cdot |B|$

If a hedged position is opened during the news period causing the net exposure to reverse direction, the margin requirement will be calculated using the news-period leverage for the exposure on the opposite side.

USDJPY	1:1000	1:2000	1:200
Period	Non ST	Non ST	ST
Margin Per lot	100	50	500

Exposure decreased and leverage increased during news period.

Leverage	1:1000	1:1000	1:2000
	Non ST	ST	ST
Long	3	2	2
Short	0	0	0
Net Exposure	3	2	2
Margin	300	200	
Exposure_Non_ST	3	$3 \cdot 2/3$	$3 \cdot 2/3$
Exposure_ST	0	$0 \cdot 2/3$	$0 \cdot 2/3$
Margin_Non_SP	$3 \cdot 100$	$3 \cdot 2/3 \cdot 100 = 200$	$3 \cdot 2/3 \cdot 50 = 100$
Margin_SP	$0 \cdot 500$	$0 \cdot 2/3 \cdot 500 = 0$	$0 \cdot 2/3 \cdot 500 = 0$
Total Margin	300	200	100

- If positions are closed during the news period to reduce exposure, the margin requirement will decrease proportionally.

- If the client's leverage is adjusted during the news period, only existing positions will be affected.

Exposure increased and leverage increased during the news period.

Leverage	1:1000	1:1000	1:2000
	Non ST	ST	ST
Long	3	3+2	3+2
Short	0	0	0
Net Exposure	3	5	5
Margin	300	1300	1150
Exposure_Non_ST	3	3	3
Exposure_ST	0	2	2
Margin_Non_SP	3*100	3*100=300	3*50=150
Margin_SP	0*500	2*500=1000	2*500=1000
Total Margin	300	1300	1150

- If opening a position during the news period increases exposure, the margin will increase according to the leverage during the news period
- If you adjust client leverage during news hours, only old positions will be affected

Hedging during the news period resulting in a change in exposure direction.

Leverage	1:1000	1:1000	1:2000
	Non ST	ST	ST
Long	2	2	2
Short	0	5	5
Net Exposure	2	-3	3
Margin	200	1500	1500
Exposure_Non_ST	2	0	0
Exposure_ST	0	3	3
Margin_Non_SP	2*100	0*100	0*50
Margin_SP	0*500	3*500=1500	3*500=1500
Total Margin	200	1500	1500

- If hedged positions are unlocked during the news period and exposure increases, the margin requirement will increase according to the leverage applied during the news period.
- If the exposure direction changes during the news period, the previous positions will no longer be considered existing positions.
- If the client's leverage is adjusted during the news period, only existing positions will be affected.
